

## Science.cplusplus.engineering Code License version 1

### Preamble

At science.cplusplus.engineering we provide code for you to use and make use of, to speed up your coding and reduce bugs. We want you to use our code. To best facilitate this, we often provide human readable code which we cannot, and do not want to, hide behind copy protection technology. We feel this gives you the best user experience and that is what we want to provide.

In return we must trust that our users respect our copyrights and do not give free copies of our source code to others. We feel we charge a fair price for our products and hope that you feel that too. Hence we ask that you engage with the spirit of this license, which is to utilise our code to create your executables, but do not unfairly distribute our code. Unfairly distributing our code could be simply giving it to somebody else as we provided it to you. Unfairly distributing our code could also be wrapping or compiling our code to create your own code with similar functionality. Basically, use our code as a tool to help write your software, but please don't just try and distribute our work as your own.

The full details of the license are below. Happy coding.

### Definitions

"This license" refers to the Science.cplusplus.engineering Code License version 1

"The Code" refers to any copyrightable work licensed under this License. This includes human readable code, and human readable code compiled into a format which may later be called by other code.

"The Licensee" refers to the person who purchased this license.

"Derivative Software" refers to any code or compiled software which uses the Code. The phrase "uses the Code" includes calling functions or methods in the Code, creating objects from class definitions in the Code, creating classes which inherit from class definitions in the Code, using values of constants from the Code or any other commonly used definition of the word "using" in the context of software development.

### Basic Permissions

1. The author of the Code retains all copyright for the Code and grants the Licensee rights under this License.
2. Modification of the Code is strictly prohibited.
3. The Licensee must be a physical person. The Licensee must not be a business, company, institution or any type of legal entity other than a person.
4. The License is not transferable to any other person or entity.
5. The Licensee may not distribute a copy of the Code to any other person or entity.
6. The Licensee may copy the Code to any computer and any location on a computer for their own use. In doing so, all reasonable steps must be taken to ensure that the Code is not used by any other person or entity, such as placing the Code in a location secured from others by a password known only to the Licensee.
7. The Licensee may utilise the Code in their own Derivative Software.
8. The Licensee may distribute Derivative Software only if the Code is not distributed in human readable form and one or more of the following conditions is met:

1. The Derivative Software has no interface which is designed to allow other software or code to interact with the Derivative Software and the Code.
  2. The Derivative Software has a significant level of data processing between an external interface and the Code.
9. In point 8. 1. above, an interface which is designed to allow other software or code to interact with the Derivative Software and the Code could be exported library functions, command line interfaces, Representational State Transfer (REST) APIs, a network interface or any other interface intended for use by software over people.
  10. In point 8. 2. above, a significant level of data processing would be attained, if the Derivative Software adds at least as much processing as the Code, when an external interface is used. It would not be attained, if the Derivative Software does not add at least as much processing as the Code, when an external interface is used.
  11. It should be noted that restrictions on distribution of either the Code or Derivative Software includes, but is not limited to, distribution to people working for the same company or institution.
  12. The Licensee is granted utilisation of the Code in accordance with this License while ever they have a subscription to utilise the Code.
  13. The subscription is currently available via the sciencecplusplusengineering Patreon page at <https://www.patreon.com/sciencecplusplusengineering> but this may change in the future.
